Executing Utility Energy Service Contracts: An Advanced Guide

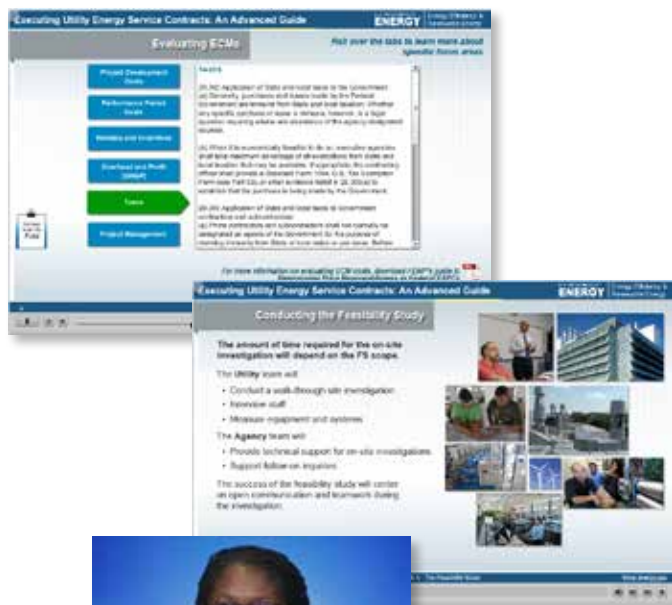

5 HRS

.50 FEMP CEUs

This course has been developed for Federal energy management and contracting/acquisition personnel seeking advanced skills in executing UESC contracting, including letters of interest, justification and approval requirements, preliminary assessments, feasibility studies, performance assurance, and project execution and closeout.

By completing this course you will learn to:

- Demonstrate a knowledge of Utility Energy Service Contracts (UESCs) and how they can help to meet site goals for energy efficiency, water efficiency, renewable power generation, and demand reduction.
- Follow best practices in contracting for major UESC tasks including Preliminary Assessments, Feasibility Studies, Project Design and Implementation processes, Performance Assurance, Final Acceptance, Invoicing Approval and Payment Processing, and Project Closeout.
- Demonstrate mastery of how to use FEMP/GSA templates and forms to streamline the contracting tasks associated with the development and implementation of a UESC.
- Work step-by-step with your utility partner to implement a Utility Energy Service under a GSA Areawide contract or other appropriate contracting vehicle.

Instructor: Karen Thomas
Senior Project Leader
National Renewable Energy Laboratory

Check out other FEMP Core Courses at
femp.energy.gov/training

FEMP Core Courses are designed for Federal energy and facility managers, but are open to all individuals at femp.energy.gov/training.
Hosted in partnership with the National Institute of Building Sciences Whole Building Design Guide at
http://www.wbdg.org/education/femp_ce.php.

Requires Google Chrome, Firefox 4.0+, Internet Explorer 7.0+ or Safari, and the Adobe Flash 9+ plugin.
After completing a course evaluation and multiple-choice assessment, participants will receive a certificate of completion and FEMP Continuing Education Units. For more information contact Leslie.Nicholls@EE.DOE.Gov.
